Welcome to NYIT Invisible Tape Demo.
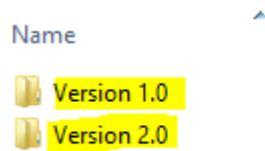

To get started make sure your computer has met the following requirements:
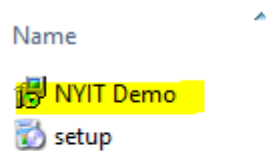

- Microsoft Kinect SDK (http://go.microsoft.com/fwlink/?LinkID=262831)
- Microsoft Kinect for Xbox hardware or Microsoft Kinect for Windows hardware
- Windows 7 or Windows 8

Installing:

1. Open the folder you wish to install
    a. –

2. Double Click on "NYIT Demo" setup file
    a. –

3. Follow the installation wizard to complete the install
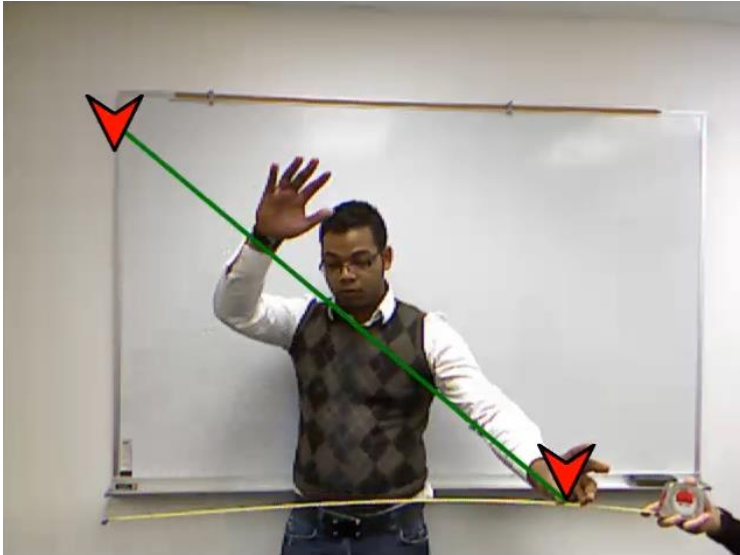

Running Version 1.0:

1. On your desktop, double click on NYIT Demo icon to start the program.

2. The red marker on the right is for your right hand and the marker on the left is for your left hand
3. To begin, raise your left hand and select the red marker on the left to define the starting measuring point.

4. When satisfied with the starting measuring point, raise the opposite hand above your head.

5. Next, raise your right hand and select the red marker on the right to define the ending measuring point.
6. When satisfied with the starting measuring point, raise the opposite hand above your head.

Running version 2.0:

1. In Version 2.0 folder, open the pdf file called Red-Fingers.pdf

2. Print the pdf file on a blank sheet of white paper.
3. Cut out the two red stripes and wrap them around your left and right index finger.
4. On your desktop, double click on NYIT Demo 2.0 icon to start the program.
5. Stand in front of the Kinect camera with your two hands facing forward. The Kinect will automatically identify the red markers on your fingers and will automatically start the measurement.
